

How to cable the link in Associative modularity

For even more impressive presentations, up to 4 units of **NeXtage 16** can be linked together. In this configuration, wide displays can be achieved, either horizontally, vertically, or both.

To control several units of **NeXtage 16** together, Analog Way's new **Vertige™** Event Controller is required.

*Please refer to the User Manual of the **NeXtage 16** or **Vertige™** for further details about the settings.*
