

Embedded Soft Edge Presentation with a Dual Head Card

Dedicated to very high resolution show installations or panoramic screens at a very effective cost. This presentation is designed with only one **Di-VentiX II** and two video projectors.

- The **Di-VentiX II** is set up in Embedded Soft Edge Mode and piloted by 2 video projectors.
- Background image is provided by a dual DVI output graphic card to fit the exact screen resolution.
- One PIP is provided by a Conferencing source.

The Video out option is recommended for having a real Preview output.

Di-VentiX II is an affordable, simple and accurate solution for a High-End Presentation showing data computer images.
